Paul,

Per our PA, I've been able to run a file search on this project. There are no sites or surveys in the project area or surrounding area, so we don't have any known sites or evidence of high site density.

There is some small potential, as always, for the presence of archaeological sites in areas such as this, so your standard language on this issue would be good to attach. My recommendation for inventory in this case is based on the information I have at hand and my understanding of the area. Other archaeologists, with more or significantly different information or with different mandates might come to a different recommendation.

Per our PA with your office, in our opinion, this email completes your 9-8-404 consultation requirements.

Thank you for considering cultural resources.

Sincerely,

Matt

Matt--

It was good to talk with you this morning. I hope I can remember all the things we decided. Don't hesitate to let me know if I vary from the right procedure.

We have a new small mine notice for an area in Bluffdale. The mine is called South Farms, and the operator is R. A. Johnson Landscaping. I'm not forwarding the notice because it has neither a legal description nor a map, but I'm attaching a map with two dots showing the approximate location. The map has the legal description. The small mine area is already disturbed, but because the operator intends to submit a large mine notice and expand his operation, your comments regarding the likelihood of encountering cultural resources in the area would still be useful.

Thank you.

Paul Baker
